PROFESSIONAL SUMMARY

Aspiring Software Development Engineer, B.Tech CSE (AI & ML), graduating 2027, with a foundation in Data Structures, Algorithms, and OOP. Builds full-stack applications with React, Node.js, FastAPI, and PostgreSQL, designs REST APIs, and ships through CI/CD with GitHub Actions.

EDUCATION

B. Tech in Computer Science and Engineering (AI & ML) — **CGPA: 7.9**
GL Bajaj Institute of Technology and Management | Greater Noida — 2023 - 2027

Intermediate — **81.6%**
Shri Gulab Rai Montessori Sr. Sec. School | Bareilly (CBSE) — 2022

High School — **90.6%**
Shri Gulab Rai Montessori Sr. Sec. School | Bareilly (CBSE) — 2020

TECHNICAL SKILLS

Programming: C++, Java, JavaScript, Python, Kotlin, HTML, CSS
Frameworks/Libraries: React.js, Redux, Next.js, Node.js, PyTorch, OpenCV, FastAPI
AI/ML: LangChain**,** LangGraph, scikit-learn, Gemini API, YOLOv5
Tools: Git, GitHub, GitHub Actions (CI/CD), MySQL, PostgreSQL, Docker, Vercel, Render
Concepts: OOP, DSA, DBMS, REST APIs
AI-Assisted Development: GitHub Copilot, Claude, ChatGPT

EXPERIENCE

Android Developer Intern | AICTE-EduSkills (Google for Developers) — **Jan 2025 – Mar 2025**

- Developed Android UI screens in Kotlin/Java with XML layouts and fixed 10+ state-management bugs caused by configuration changes.
- Integrated a Firebase backend through REST APIs for real-time data sync, reducing manual data-fetch latency by ~25%.
- Collaborated in Agile sprints using Git branches and pull requests, and resolved merge conflicts during code review.

PROJECTS

Smart Budget AI | FastAPI, PostgreSQL, React, LangGraph, Gemini API — **2026**

- Engineered a full-stack finance assistant (FastAPI, PostgreSQL, React) that parses bank statements from 5 banks and auto-categorizes transactions via fuzzy merchant matching.
- Designed a LangGraph multi-agent pipeline that routes user queries to up to 4 parallel agents and combines their outputs through the Gemini API into real-time financial insights.
- Implemented an Isolation Forest anomaly detector (scikit-learn), wrote 76 pytest cases, and automated deployment with GitHub Actions to Vercel and Render.

Smart Traffic Management System | Python, OpenCV, PyTorch, YOLOv5, NumPy — **2024**

- Created a real-time traffic system in Python and OpenCV that detects vehicle density across 2 simulated lanes.
- Applied YOLOv5 for vehicle detection on simulated lane feeds, reaching ~92% accuracy.
- Programmed signal timing that adjusts green-light duration based on per-lane vehicle density, cutting average wait time by ~35% in simulation.

CERTIFICATIONS

- **NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) | Udemy** — **Oct 2026**
- **AI Agents Course | Hugging Face** — **Aug 2026**
- **React -The Complete Guide 2025 (incl. Next.js, Redux) | Udemy** — **Nov 2025**

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Solved 300+ LeetCode problems across arrays, strings, Linked List, trees, and DP; contest rating 1585.
- Developed an AI-powered ocean hazard intelligence platform in 24 hours at the Synapse.AI Hackathon (DTU, New Delhi) using Python, Java, Node.js, and [MySQL/PostgreSQL] and placed Top 10 out of 50 teams.
- Prototyped a solution for a national-level problem statement at Smart India Hackathon (institute level).
