PROFESSIONAL SUMMARY

Software developer with a strong foundation in Data Structures, Algorithms, and OOP, and hands-on full-stack experience with React.js, Node.js, and FastAPI. Built and deployed an AI-powered finance app using LangGraph multi-agent pipelines, and worked on REST API integration and Android development. Seeking SDE roles to build scalable, performance-driven products.

EDUCATION

B. Tech in Computer Science and Engineering (AI & ML) — **CGPA: 7.9**
GL Bajaj Institute of Technology and Management | Greater Noida — 2023 - 2027

Intermediate — **81.6%**
Shri Gulab Rai Montessori Sr. Sec. School | Bareilly (CBSE) — 2022

High School — **90.6%**
Shri Gulab Rai Montessori Sr. Sec. School | Bareilly (CBSE) — 2020

TECHNICAL SKILLS

Programming: C++, Java, JavaScript, Python, Kotlin, HTML, CSS
Frameworks/Libraries: React.js, Redux, Next.js, Nodejs, PyTorch, OpenCV, FastAPI
AI/ML: LangChain**,** LangGraph, scikit-learn, Gemini API, YOLOv5
Tools: Git, GitHub, Github Actions (CI/CD), MySQL, PostgreSQL, Docker, Vercel, Render, Github Copilot, Claude
Concepts: OOP, DSA, DBMS, REST APIs

EXPERIENCE

Android Developer intern | Google (Virtual) — **Jan 2025 – Mar 2025**

- Built and integrated Android UI components using Kotlin/Java and XML layouts, managing full activity lifecycle and resolving 10+ bugs related to state management during configuration changes.
- Implemented REST API integrations with Firebase backend, enabling real-time data sync and reducing manual data fetch latency by ~25%.
- Engineered a robust Git workflow within Agile sprints, maintaining an immaculate commit history that streamlined code reviews and reduced merge conflicts by 40%.

PROJECTS

Smart Budget AI | FastAPI, PostgreSQL, React, LangGraph, Gemini API — **2026**

- Built Smart Budget AI in Agile-style sprints - a full-stack finance assistant (FastAPI, PostgreSQL, React, Node.js) that parses bank statements from 5 major banks and auto-categorizes transactions via fuzzy merchant matching.
- Designed a multi-agent AI pipeline with LangGraph, dynamically routing user queries across up to 4 parallel specialist agents and synthesizing responses through the Gemini API for real-time financial insights.
- Engineered and validated a custom Isolation Forest anomaly-detection model (scikit-learn), rigorously testing AI-assisted feature logic against 76 pytest cases to ensure accuracy before CI/CD deployment via GitHub Actions to Vercel and Render.

Smart Traffic Management System | Python, OpenCV, PyTorch, YOLOv5, NumPy — **2024**

- Developed an AI-based real-time traffic management system using Python and OpenCV to detect vehicle density across 2 simulated lanes.
- Implemented YOLOv5 object detection model achieving ~92% detection accuracy, dynamically adjusting signal timing and reducing average vehicle wait time by ~35% in simulation.

CERTIFICATIONS

- **React -The Complete Guide 2025 (incl. Next.js, Redux) | Udemy**
- **NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) | Udemy**
- **AI Agents Course | Hugging Face**

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- LeetCode rating: 1585 | Solved 300+ problems across DSA topics including arrays, trees, and dynamic programming.
- Participated in Smart India Hackathon (SIH) at institute level-developed a prototype for a national-level problem statement.
- Participated in Synapse AI Hackathon organized by (DTU) - built an AI-powered solution under 24 hours.
